

Tweedmouth West First School

Our Maths Curriculum

*R*espect *R*esponsibility *R*esilience

Our maths curriculum is designed to give children confidence in their mathematical skills, and to ensure that they are not afraid to try new ideas and to make mistakes. They have opportunities to solve complex problems, working collaborately, and achieving real satisfaction when a solution is found.

We follow the White Rose scheme, and this ensures a steady progression across the school from Early Years to Year 4.

We are beginning to use a Mastery Approach to support teaching and learning.

Across the school, children have a daily Big Maths CLIC session, concentrating on fluency and basic number skills.
