

Tweedmouth West First School

Intent, Implementation, Impact - Geography

Respect Responsibility Resilience

Intent	To inspire pupils' curiosity to discover more about the world
Implementation	To ensure high standards of teaching and learning in geography. To implement a curriculum that is progressive throughout the whole school.
Impact	Our geography curriculum is high quality, well thought out and is planned to demonstrate progression. We focus on progression of knowledge and skills and discreet vocabulary progression also form part of the units of work. Children will deepen their understanding of the interaction between physical and human processes and how this affects landscapes and environments.
